Week 7

Research Timelines

Jonathan A. Pedroza (JP) PhD

2026-10-06

Announcements

- Due dates are now suggestions
  - Get everything in before RRR week
  - Except presentations & final papers
- Complete the following spreadsheet

How granular should your timeline be?

- Daily
- Weekly
- Biweekly
- Monthly

Creating a timeline

- Include everything you think may come up
- Give yourself more time than you think something will take
  - It will take longer
- Add times to go back to certain topics on your timeline
- This is a rough draft; it does not need to be perfect

Timeline Template

- Timeline template; please make a copy

What are potential bottlenecks

- Unexpected topics
  - CITI training
  - Specialized training for data collection
  - Waiting on someone to gain access to data
  - Advisor decides they no longer want to be your advisor
  - Merging and overwriting code on GitHub
  - Pivots on research topic based on new research or new lab findings
  - Anything else

Add a second tab

- SMART goals
- Add your weekly goals to your timeline to help you stay on track

Pivot for Class

- Going to use the rest of the time to see how I can help you
- If you feel confident in where you are, you can leave
  - **This may be the only time (outside of office hours) where I can help you with the interpersonal component of your project**
